

Master (MScE 1D)	Master Program:
<i>Title:</i>	Mathematics for Economists
<i>Lecturer:</i>	Prof. Dr. Jürgen Eichberger
<i>Tutor:</i>	Florian Kauffeldt
<i>Teaching Language:</i>	English (or German)
<i>Teaching Method:</i>	Lecture and Tutorial (L/T)
<i>Lecture/Tutorial Hours per Week</i>	3L / 2T
<i>Day/Time/Room:</i>	L: Thu 14:00-17:00, HS Campus Bergheim T1: Tue 13:00-15:00, 00.010 CB T2: Wed 12:00-14:00, 00.010 CB
<i>Start of Lecture:</i>	Thursday, October 18, 2012

General Course Information:

Objectives: The lecture plus the associated tutorials will provide students with the mathematical concepts necessary for dealing with optimisation problems, equation systems, and simple dynamic problems. After completing this course successfully, students will have the necessary prerequisites for reading economic journal articles of moderate mathematical content.

Assessment: 2-hours examination

Course Outline:

1. Introduction: Optimisation for Functions of One Variable
2. Sets and Functions
3. Functions of Several Variables
4. Multivariable Constrained Optimisation: Kuhn-Tucker Theorem
5. Solutions of Equation Systems
6. Dynamic Analysis
7. Intertemporal Optimisation
