

Exploring the Framework's potential in different national contexts and policy areas

**ecpr** PRESS

## **Decision-Making under Ambiguity and Time Constraints**

**Edited by Reimut Zohlnhöfer and Friedbert W Rüb**

**In many advanced democracies, policy issues have grown so complex and politically contestable that governments often do not understand the problems they have to deal with – or how to solve them.**

When policy-makers are ambiguous about which policies to pursue, rational problem-solving models struggle to explain their policy-making. Conversely, the Multiple Streams Framework assumes from the start that policy-makers have unclear policy preferences.

The Framework's success has led to increasing academic interest, but there has not yet been a systematic attempt to assess the potential of such scholarship.

Zohlnhöfer & Rüb's volume makes the first attempt to fill that gap, by bringing together a group of international scholars to assess the strengths and weaknesses of the Framework from different angles.

Chapters explore systematically and empirically the Framework's potential in different national contexts, and in policy areas from climate change and foreign policy, to healthcare and the welfare state.

### About the editors

**Reimut Zohlnhöfer** is professor of political science at the University of Heidelberg. Previously, he worked at the University of Bremen's Center for Social Policy Research and Harvard University's Center for European Studies, and held a professorship of comparative public policy at the University of Bamberg. He has published in leading journals and edited numerous volumes and special issues, most recently *Developments in German Politics 4* (Palgrave, 2014).

**Friedbert W Rüb** has been professor of political sociology and social policies at Humboldt University Berlin since 2008. Prior to that he was a professor at the University of Hamburg. He has published on democratisation processes in Eastern Europe, on social policies in Germany, on political parties, and on governance problems in the German Republic. He is also co-editor of two special issues of *German Policy Studies* concerning changes to the Bismarckian welfare state.

*'...offers a timely overview of key comparative, empirical-methodological, and theoretical issues... will interest the many policy scholars who draw on this now-classic framework.'*

**Daniel Béland, University of Saskatchewan**

*'This outstanding compilation provides a theoretically in-depth and empirically profound discussion, implementation and problematisation of the Multiple Streams Approach. The contributors are a mixture of high-ranking experts and talented junior researchers who enhance our broader understanding of the theoretical framework and examine thoroughly the possibilities of applying the approach in practice.'*

**Nils Bandelow, Technische Universität Braunschweig**
