

# Lieseberg-Kolloquium

## Sommersemester 2024

Dienstag,  
16.04.2024  
HS West, 17 c.t.

**Prof. David Powers**  
*Making, Seeing, and Using Subvalent Nitrogen Species*  
Texas A&M University (USA)

Dienstag,  
30.04.2024  
HS West, 17 c.t.

**Prof. Torsten Beweries**  
*Group 4 metallacyclobuta-2,3-dienes - Classical metallacycles or unusual transition metal biradicals?*  
Leibniz Institute for Catalysis, LIKAT Rostock (DE)

Dienstag,  
14.05.2024  
HS West, 17 c.t.

**Dr. Terrance Hadlington**  
*Leveraging cooperativity at the molecular main group – transition metal interface*  
TU München (DE)

Dienstag,  
28.05.2024  
HS West, 17 c.t.

**Dr. Golo Storch**  
*Combining photochemistry and biomimetic oxygenation: Sequential transformations with molecular flavin catalysts*  
TU München (DE)

Dienstag,  
02.07.2024  
HS West, 17 c.t..

**Dr. Alex Gillett**  
*Spin-triplet excited states in organic semiconductors*  
University of Cambridge (UK)

Dienstag,  
16.07.2024  
HS West, 17 c.t.

**Dr. Pierre-Antoine Bouit**  
*P-containing Polycyclic Aromatic Hydrocarbons*  
CNRS researcher, Institut des Sciences Chimiques de Rennes (FR)
