

Lieseberg-Kolloquium

Sommersemester 2018

Montag,
16.04.2018
kl. HS, 14 c.t.

Dr. Henry Dube
From Indigoid Photoswitches to Molecular Machines
Department Chemie, Ludwig-Maximilians-Universität München

Montag,
14.05.2018
kl. HS, 14 c.t.

Prof. Dr. Norbert W. Mitzel
Strukturchemie in Gasphase und Festkörper – was man aus Unterschieden lernen kann
Anorganische Chemie und Strukturchemie, Universität Bielefeld

Montag,
28.05.2018
kl. HS, 14 c.t.

Prof. Dr. René Boéré
Electrochemistry and Spectroelectrochemistry for the Elucidation of Redox-Activity in Compounds of p-Block Elements including Carbon
Dept. Chem. & Biochem., University of Lethbridge, Alberta, Canada

Montag,
04.06.2018
kl. HS, 14 c.t.

Prof. Dr. Dieter Lentz
Fluor als Schlüsselement
Institut für Chemie und Biochemie, Freie Universität Berlin

Montag,
02.07.2018
kl. HS, 14 c.t.

Prof. Dr. Robert Wolf
White Phosphorus Activation and Functionalization Using First-Row Transition Metal Complexes
Institut für Anorganische Chemie, Universität Regensburg

Montag,
09.07.2018
kl. HS, 14 c.t.

Prof. Dr. Guido Clever
Rational Assembly of Multifunctional Coordination Cages
Anorganische Chemie, Technische Universität Dortmund

Montag,
16.07.2018
kl. HS, 14 c.t.

Prof. Dr. Gopalan Rajaraman
Synergy Between Experiment and Theory: Examples from Magnetic Materials and Metal Mediated Catalytic Reactions
Dept. of Inorg. Chem., Indian Institute of Technology, Bombay
