	Th	14:00	16:00	Neue Uni Hörsaal 4, Grabengasse 3-5

Start: Tuesday, April, 19th 2016

### **Description:**

„Economic and Social Statistics“ is a compulsory course for students in the BSc in “Economics”, “Politische Wissenschaft“ and “Soziologie” programs. The course consists of an *interdisciplinary* and a *subject-specific* module. The interdisciplinary part consists of a 3-hour lecture and a 2-hour tutorial during the first ten weeks of the term. The course offers an understanding of descriptive statistical methods and their usage in the analysis of economic, political and social problems. For students of “Politische Wissenschaft“ and “Soziologie”, the interdisciplinary part is followed by a subject-specific lecture in weeks 11 to 15 of the term. The subject specific part for students of Economics consists of five 2-hour computer tutorials with STATA during the first ten weeks of the term.

### **Contents:**

Statistical methods in economics and social sciences (objectives, methods), data acquisition and classification of data (methods of data collection, statistical units and populations), data attributes and measurement (frequency distribution, measures of central tendency and dispersion, ratios, indices), measures of concentration, measures of correlation, simple linear regression.

### **Exam:**

Exam (general part) and subject-specific exam (STATA Take-Home-Exam).
