

Table 1: List of available datasets

Name	Short Description	Links
Tracking Chinese Development Finance worldwide*	This dataset will contain project-level information on Chinese official development finance to Africa, Asia and Latin America from 2000-2014. The dataset, currently being coded at AidData , is close to completion.	<i>Forthcoming</i> (click here for the earlier 1.2 Africa version)
Chinese Official Finance to Africa (georeferenced)	This is a sub-nationally georeferenced dataset of Chinese official finance activities that spans 50 African countries over the 2000-2012 period. It includes 1,952 Chinese development finance projects across 3,545 physical locations. In order to build this dataset, AidData applied its double-blind geocoding methodology to the 1.1 (static research release) version of its Chinese Official Finance to Africa Dataset.	Documentation

Chinese Official Finance in Three Ecologically Sensitive Areas (georeferenced)	This is the 1.0.1 version of the Level 1 product of a sub-nationally georeferenced dataset of Chinese official finance activities between 2000 and 2014 in three ecologically sensitive regions – the Tropical Andes in South America, the Great Lakes of Africa, and the Mekong Delta in Southeast Asia.	Documentation
		Download data
Official Indian Aid worldwide (georeferenced)*	This dataset offers project-level information on Indian development cooperation (provided through India’s Ministry of External Affairs and EXIM bank) spanning 108 countries from 2006-2014. It contains 1,207 unique projects often with multiple locations for each project. The dataset, currently being coded at Heidelberg University , is close to completion.	<i>Forthcoming</i> (click here for sample data)
Liberia Concessions (georeferenced)	This geocoded dataset release represents all concession licenses sourced, as of June 15, 2016, from the Liberian Extractive Industries Transparency Initiative (LEITI), the Mining Cadastre Administration System (MCAS), and the Liberia National Concessions Portal (LNCP), along with additional information collected using AidData’s “TUFF” open-source data collection methodology.	Documentation
		Download data
New Donors Database*	This dataset offers information on 120 countries from 1945-2015 on key milestones in their transition to becoming a donor of development aid. In particular, the dataset incorporates the year of a country’s first outgoing aid project, the name and year of its current governmental institution responsible for aid provision, the name and year of establishment of its first aid-providing institution, and the name and year of its first aid legislation. The dataset, currently being coded at Heidelberg University , is close to completion.	<i>Forthcoming</i> (click here for sample data)
AidData's Core Research Release 3.0	AidData's Core Research Release 3.0 is a snapshot of the AidData's entire project-level database from April 2016. This database includes commitment information for over 1.5 million development finance activities funded between 1947 and 2013. The dataset covers 96 donors and includes ODA, OOF flows, Equity Investments, and Export Credits where available.	Documentation

** These datasets have not yet been made publicly available. We will grant early access to workshop participants under the condition that the datasets and resulting working papers will not be shared outside the group of workshop participants prior to their respective official release by AidData and/or Heidelberg University in the course of fall 2017.*

Note: The beta release of AidData's new data extraction tool, Geo(query), helps researchers to more easily access and use geospatial data. Link: <http://geo.aiddata.org/query/#/>
