

Position available for a research assistant (HiWi) (20.07.2018)

The research group of Dr. Kevin Allen is seeking a student to work as a research assistant (HiWi) on the neuronal basis of spatial behavior. The group is based within the Department of Clinical Neurobiology, Medical Faculty Heidelberg and DKFZ (<http://www.allenlab.spica.uberspace.de>).

Our research group is interested in the spatial representations generated within the mammalian brain and their contributions to spatial behavior and memory. The spatial representations generated by grid cells in the medial entorhinal cortex are a prominent example. The student will acquire experience in a wide array of techniques, including in vivo tetrode recordings in mice, data analysis, and histological analysis.

The students will receive a HiWi contract until December 31st. The starting date could be the 1st of August 2018, or as soon as possible thereafter. Applicants should send their CV to Dr. Kevin Allen via email (allen@uni-heidelberg.de).
