HYBRID SYMPOSIUM

- **08.30 08.45**Arrival of participants
- **08.45 09.00 Welcome**:
 Birgit Teichmann, Network Aging Research,
 Heidelberg University (Germany)

The GECONEU project aims to develop an online course for university students focusing on genetic counseling. The main goals and central impact of this project is to support people and society to better understand the aims of genetic testing and the usefulness of genetic counseling by involving students in an innovative learning and teaching setting. This project will provide the opportunity to take all the factors of an appropriate training course for society into account by involving the families of people with neurodegenerative disorders in the development of the learning and teaching outcomes, consequently improving their visibility and enhancing their level of knowledge.

GECONEU – GENETIC COUNSELING IN EUROPEAN UNIVERSITIES: THE CASE OF NEURODEGENERATIVE DISEASES

09.00 - 09.15

The benefits from the announcement of ApoE results: Natural products as protective factors for AD Magda Tsolaki, Greek Association of Alzheimer's Disease and Related Disorders, Thessaloniki (Greece)

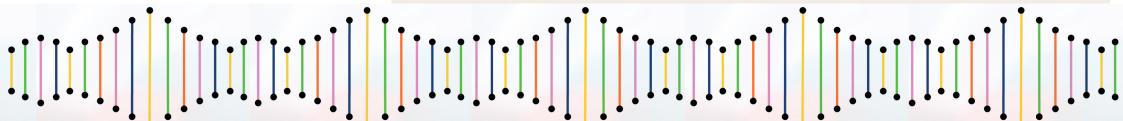

- 09.15 09.30 Caregivers' and non-caregivers' attitudes regarding pre-symptomatic dementia testing Marina Makri, Aristotle University of Thessaloniki (Greece)
