

Six partners, three challenges, one vision

WHAT?

TermiKnowledge is an international course in creating terminological resources. You will learn how to create a corpus, extract terms manually, automatically and semi-automatically, identify their equivalents in other languages, design a knowledge base and create terminological entries. At the end, your work will be published online for public use!

WHO?

The course is run under the 4EU+ Alliance by an **international team of experts** in terminology, corpus linguistics, translation and knowledge representation. It will involve instructors and students from **four European universities**: University of Warsaw, Heidelberg University, Charles University in Prague and Milan University.

FOR WHOM?

We offer a limited number of places to **BA and MA students** with a good command of **English**. The course will address the needs of students in translation, interpreting, linguistics, sociology, journalism and media studies, as well as natural sciences, engineering, computer science and information technologies who work with texts in a specialized domain. Stay tuned for information about the recruitment procedure!

WHEN?

The project includes two courses in terminology (Semester 1 and Semester 2). These courses are independent, but you are encouraged to attend both. Semester 1 begins in **mid-October 2021** and ends in **March 2022**, i.e. it lasts approximately 15 weeks.

HOW?

The course will consist in **on-line research-based classes**, short **visits abroad** and face-to-face meetings between student and staff of the partner universities, as well as **collaborative practical tasks** on the creation of terminological and lexicographic resources.

WHY?

- new competencies and tools
- work with foreign languages
- **6 ECTS** credits per semester
- short-term mobilities
- international environment
- innovative learning methods
